

Intel D2000 UFO Target

The CW308T-D2000 target series allows experiments on the unique D2000 target from Intel. This target has an X86 core in a microcontroller body. You can experiment with various aspects of the device and see how something besides an Arm device performs!

Note this device does not have programming support from ChipWhisperer - it is recommended to use an OpenOCD programmer (such as ARM-USB-OCD-H) with this board.

Example software AES library implements SimpleSerial ENC protocol.

CW308 UFO Baseboard Required for use!

JTAG Programmer Required for use!

Product Highlights

FND2000 device from Intel in QFN package.

Basic board interfaces with ChipWhisperer CW308 UFO Board.

SimpleSerial example provides starting point for interfacing with ChipWhisperer software.

D2000 has unique x86 based core.

Ordering Summary

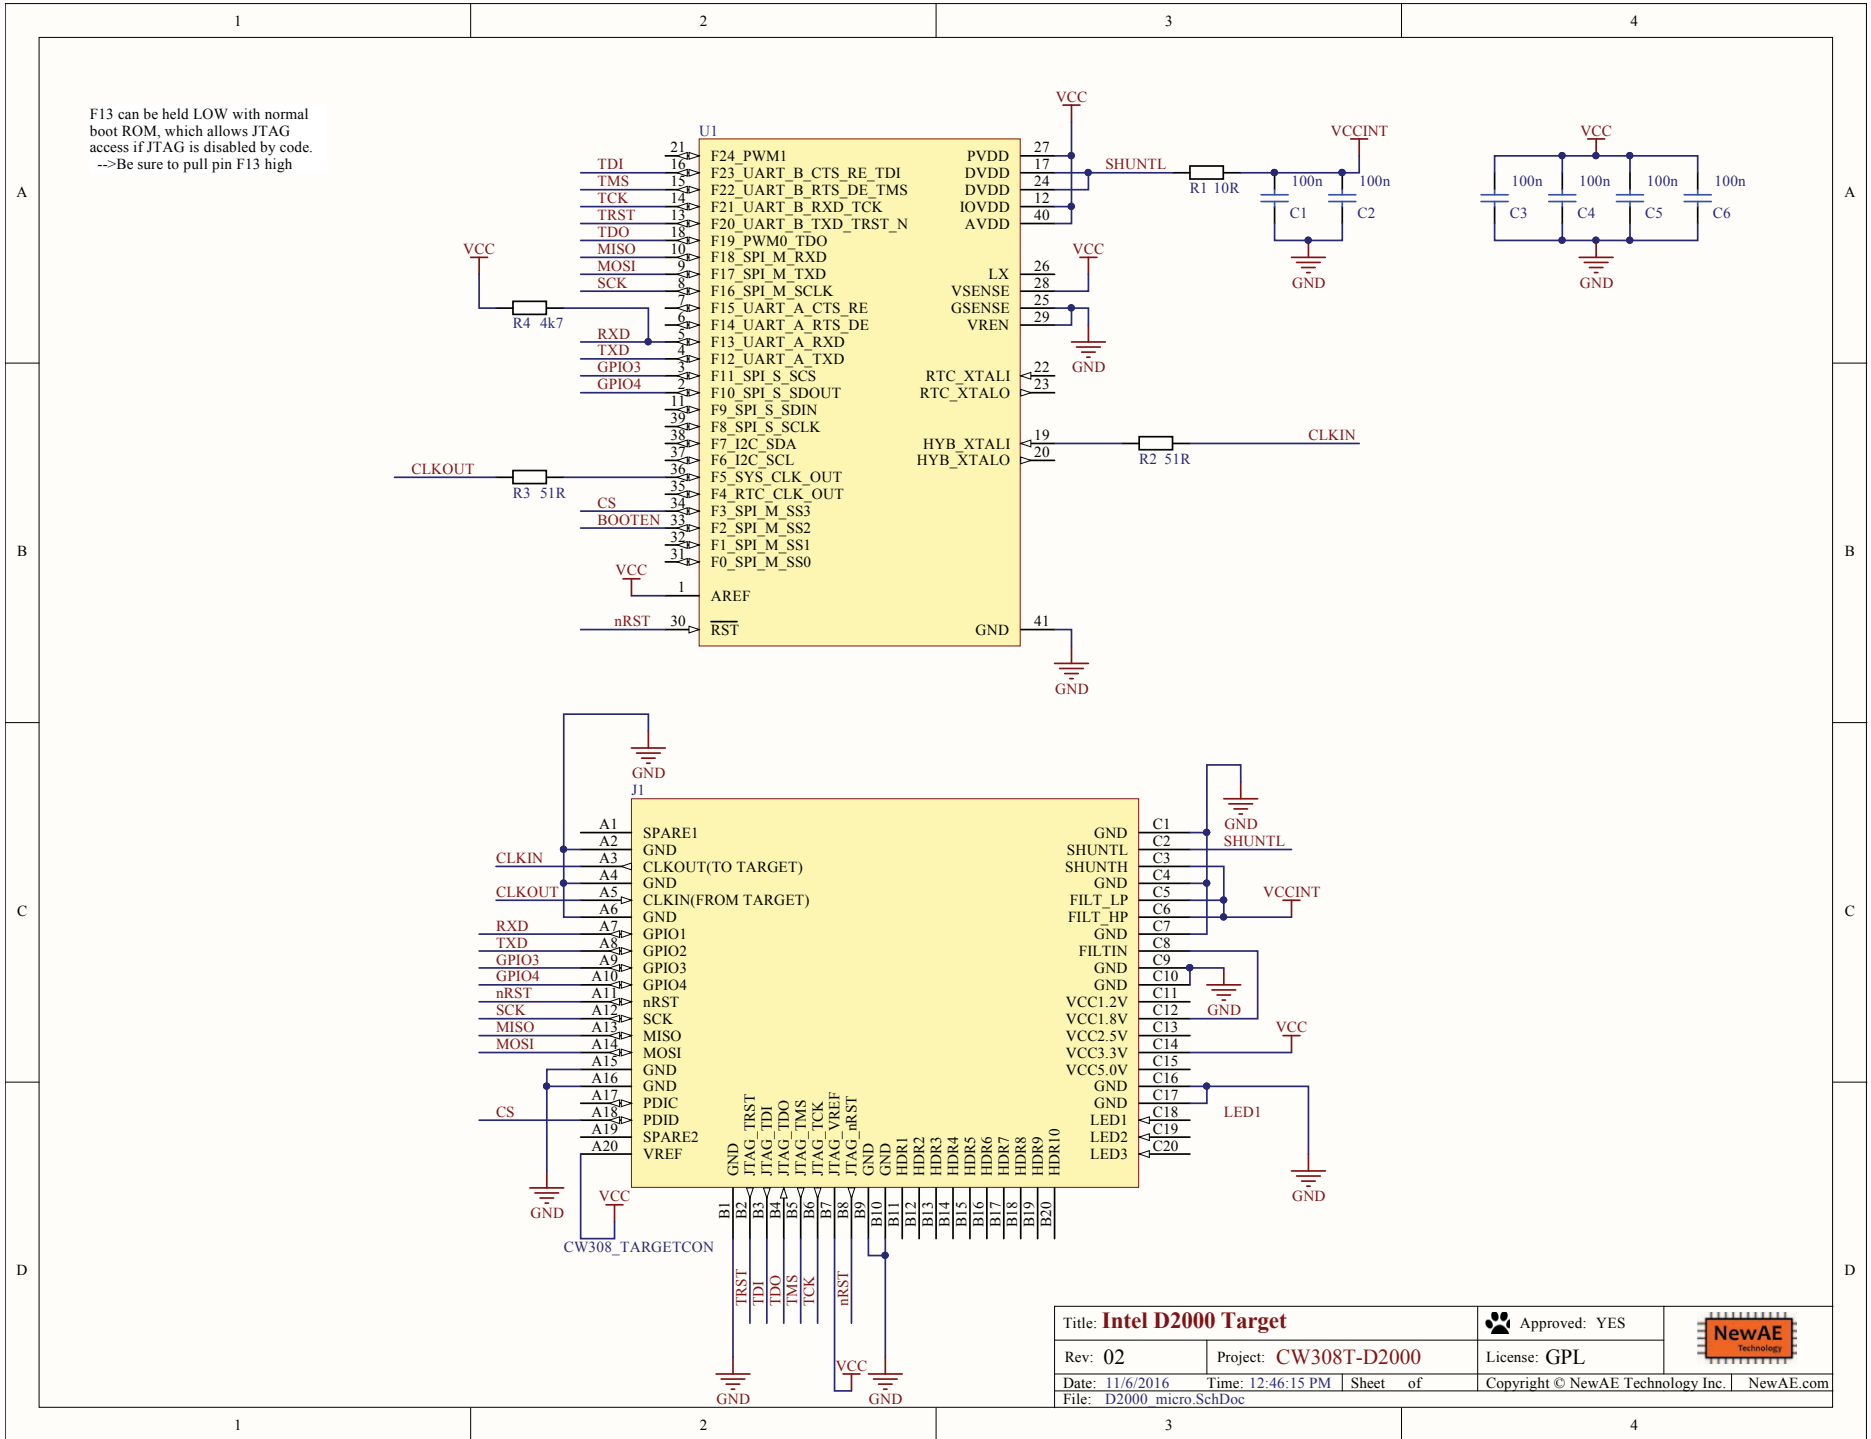

NAE-CW308T-D2000 Intel FND2000 UFO Target.
